

# Achieve3000 Math™

## Best Practices for Students

- Most students will benefit from approximately **60 minutes per week** in Achieve3000 Math. 
- Students use **paper/pencil**, use a **math journal** for recording work, or use white boards for recording work while doing Achieve3000 Math assignments.
- Students can **ask the teacher for help** while doing Achieve3000 Math ONLY **after they've viewed the hints** (*Ask 3 Before Me* or another management tip).
- Unless assessing *computation*, students should be permitted to **use calculators** on Achieve3000 Math.
